Rentex Product No. LED7000

Mfr Part No. LC-70LE734U

With the introduction of the 70" class (69.5" Diagonal) LC-70LE734U, Sharp once again reinforces its leadership in LCD and LED technology. Sharp's proprietary quad pixel technology adds a fourth color, yellow, to the traditional RGB pixel format, enabling many colors to be displayed for the first time. Featuring more colors than any other television, see never-before-seen colors like sparkling golds, Caribbean blues and sunflower yellows. On the LC-70LE734U, this technology is enhanced further with Quad Pixel Plus, which produces smoother lines by enabling the individual control of all 8-million sub-pixels on the screen.

The proprietary AQUOS LED system comprised of the X-Gen LCD panel and UltraBrilliant LED enables an incredible dynamic contrast ratio of 6,000,000:1 for excellent picture quality. AquoMotion 240 virtually eliminates blur and motion artifacts in fast-moving video and, with built-in WiFi, connectivity is easier than ever. Dual USB media players for portable video/music player are also included for your convenience
