Rentex Product No. LITCN12

Mfr Part No. 90-21-0034

Leprecon's twelve channel LP-612 console incorporates the same full travel faders and rugged aluminum chassis design that make our touring consoles the most reliable in the industry. With full size fader knobs, quick action-bump buttons, and big bright LED's, this console was designed and built for professional use. The console includes: two scene preset mode with twelve channels; switchable Add or Solo momentary buttons for each channel; and dipless crossfade between manual scenes. Presets may be "piled on" in any combination, and are assigned to one of four memory pages. Preview mode allows cues to be checked without bringing up the scene on stage. An existing cue may be easily edited using the manual scene faders without rerecording the entire cue.

Cue Stack offers 50 programmable cues with crossfader and "GO" button control. Fade times may be assigned to each scene. A two-character display is used to indicate current or new cue and programmed fade times assigned to each scene. Four programmed and seven programmable patterns of up to 20 steps are provided. Programmable patterns are recorded, previewed, and edited as easily as the preset cues. The rate of each pattern may be saved with the chase, eliminating the need to adjust the rate pot when chase is recalled. Control outputs include 3-pin microplex and 5-pin DMX-512 standard.

Features

- Two Scene Preset Mode - Allows manual control of lighting
- Control up to 96 dimmers on 12 faders
- Chase Memory
- Cue Stack and Go Button
- Four Pages of Playback Memories
- Simultaneous DMX and Microplex control output
