## Apple MacBook Pro with Retina Display

**Mfr Part No. Z0ML-2000027266**  
**Rentex Product No. MAC5300**

A Retina display with 5.1 million pixels; an all-flash architecture; quad-core Intel Core i7 processors; all in a design that's just 0.7" thick and 4.5 pounds. It's not just the most advanced notebook Apple has ever made, it's the most advanced Mac.

When you pack over 5 million pixels into a 15.4-inch display, the results are positively stunning. The pixel density is so high, your eyes can't discern individual pixels. Images take on a new level of realism and text is pin sharp. And with a 2880 x 1800 resolution, you can see more of your high-resolution images onscreen with pixel-for-pixel accuracy. So your best ideas can become your best work.
