D'SAN PRO2000BT Limiter Kit

Mfr Part No. PRO-2000 BT

The D'San Limitimer PRO-2000BT is an automated speaker timer system that provides an ideal wireless time-keeping solution during presentations. With 4 programmable time modes that provide total time, remaining time, sum-up time, and beep / blink settings, the timer provides versatile cue options via beep, blink, or beep-blink combinations.

The locally powered receiver communicates with the transmitter via Bluetooth and is capable of driving up to 4 signal lights. You can connect a second timer to the receiver and configure both the timers for start/stop control.

Global timer options include count-up or count-down, stop-clock or continuous count, minutes : seconds or hours : minutes, and ring/buzz/chime-based audible cues. You can connect two Limitimer consoles to one or more signal lights and configure them to allow start and stop control

Features

- Beep / Blink / Beep-Blink Cue Options
- Global Timer Options
- Configuration Control Support
- 4 Time Programs
- Automated Speaker Timer System
- Wireless Operation via Bluetooth
- Locally-powered Receiver

D'SAN Podium Signal Light

Model PSL-20V

D'SAN Audience Signal Light 4" LED Display

Model ASL4ND3

D'SAN Bluetooth Transceiver

D'SAN PRO-2000BT Limiter

*All Limitimer signal lights contain both input and output jacks so that they may be interconnected in a daisy chain fashion to create a custom display configuration.

Switches on bottom of unit allow selection of "Beep," "Buzz," or "Ding-Dong" sounds - or no sound; turn off/on top phase lights for privacy; set display to stop at 0:00 or continue counting; and set which of Limitimer's four timer programs signal light should receive (any or all).
