

Rentex Computer & Audio Visual Rentals Now Offering Panasonic's PT-DZ21K2 DLP Projector

[Rentex Computer & Audio Visual Rentals](#), one of the largest, most respected providers of computer & audio visual rentals, is pleased to announce that the popular Panasonic PT-DZ21K2 digital projector is now available for rent nationwide from the company's 9 locations.

Rentex Computer & Audio Visual Rentals is pleased to announce that it has added Panasonic's popular PT-DZ21K2 digital projector to its rental inventory, strengthening the company's already robust DLP projector rental offerings.

The PT-DZ21K2 is a high-end 20,000 lumens projector built specifically for large venue projection and the creation of high-end audio visual experiences. Rentex provides a full suite of lensing options including the new ET-D75LE90 Ultra Short Throw .03 Panasonic Lens. The DZ21K2 projector is small and light weight for its class, only 90.4 lbs. Other features include the Panasonic Quad-Lamp System, Digital Clarity Processor 5, and the Dynamic Iris, which enables it to display motion with great fluidity in a variety of light conditions, while dramatically reducing cabinet volume and weight.

"The PT-DZ21K2 is a great option for companies or organizations that are looking to provide a unique, premium experience," says Don Gaskill, SVP of Operations and Finance. "Because of its flexibility and configurability, the DZ21K series was used widely at the 2012 Olympic Games in London, and has been the choice for numerous other major events, including upcoming the 2016 Rio Olympic Games. We're excited to offer it to our cross rental customers."

In addition to its impressive 1080p (1920 x 1200) HD display capabilities with a 16:10 aspect ratio, the PT-DZ21K2 boasts a variety of benefits over other high-end projectors, including a liquid cooling system, multi-screen support, and the backup input feature, which result in reduced power consumption and enhanced reliability for mission critical applications, like projection mapping, where image display must be continuous.

"Not only is the PT-DZ21K2 a great large-venue projector, but it has a lot of features that help ensure it remains an efficient, environmental friendly option for applications that require high reliability in even challenging circumstances," said Rob Garvey, Sales Manager.

Rentex has over 30 years of experience supplying computer and audio visual rental equipment and solutions to companies all over the United States. It operates a nationwide network of offices and warehouses, including Boston, Philadelphia, New York/NJ, Washington D.C., Chicago, Dallas/Ft Worth, Las Vegas, Orlando, and most recently in Anaheim/LA, California.
