

Product Spec Sheet from Rentex

Telex PST-170 Portable Beltpack Transmitter

Mfr Part No. F.01U.118.402
Rentex Product No. COMTSAB

The Telex PST-170 is a portable assistive listening and personal monitoring belt pack transmitter using 17 VHF channels with frequencies in the 72-76 MHz band. It is lightweight, battery operated and equipped with a small electret lapel microphone. The PST-170 has a side panel Auxiliary input designed to connect audio devices such as teacher's aids or tape players, and a microphone input located on the top panel. The selected channel is displayed on a backlit LCD, and may be locked to prevent accidental changes.

Features

- Portable wireless personal monitoring/assistive listening transmitter
- 17 selectable frequencies available for transmitter, backlit LCD readout
- E.D.R. (Enhanced Dynamic Range) compander circuitry for transmitter; clearer, more consistent output
- 300' operating range
