

Rentex No. ENGRCK1

Designed and pre-wired to make it plug and play to save time on show. Just give it power, patch in your cameras to the inputs, and everything else is already pre-wired and programmed. The system includes a special router output for the show lighting designer that allows them to go through the inputs and see their look to make sure it is exactly how they want it.

FEATURES

- Designed and pre-wired to make it plug and play to save time on show
- Includes a special router output for the show lighting designer
