Marcus is right at home with the biggest and best projectors we own. You rarely find him sitting at a desk. He's hands on and loves digging into the technology.

Meet Marcus DeLuco

- Favorite Movie - Running Scared and Quigly Down Under
- What's on his Favorite Playlist - Metallica and Dean Martin

Bio: It's no wonder a kid would develop a love of video and electronics when he used to spend weekends at work with his dad at a major television studio hanging out in the edit studios with people like Carol Burnette. In this case, dad was in charge of keeping all the edit bays up and running. Partner that with formal education in theater and electronics, plus a love of photography and you've got yourself one heck of talent for working with all the stuff we love to rent here at Rentex – especially projectors and any display device.

Marcus came to Rentex about a year and a half ago after working at another major cross rental company for over 15 years. Prior to that, he managed the equipment, maintenance, and troubleshooting for several production and staging companies. Marcus can handle anything technical, but, very few people in the world can troubleshoot or diagnose a projector issue like he can. A love of photography has made him an expert in color and imagery. So, he knows what the image should look like. Understanding video and electronics and how the colors are actually "made" electronically, make it easy for him to diagnose just about any problem with a projector and fix it.

All of our projector and LED QC personnel are trained by Marcus, all facilities for the QC of these items are designed by Marcus, and he holds personnel accountable for sending out the best possible equipment every time. Wonder why Rentex gear is always in tip top shape? It takes a whole team and Marcus is key to getting that done and a lot more. We hope you never have an issue with one of our projectors, but, if you do Marcus and team will surely get you up and running.
