Mfr No. INNPBX
Rentex No. XAPG200

FEATURES

- Excellent Separation of Caller and Talent Voice
- 16-bit DSP technology
- Proprietary Auto Null Algorithm (50 dB null)
- Send XLR Line Input
- Mic/Line Switch

Innkeeper PBX easily converts your multi-line PBX type telephone system into a professional, affordable talk show console. Simply connect between your telephone handset and the phone base. So simple, anyone can do it. The digital hybrid connects audio signals to your PBX type telephone system through the telephone handset cord. Innkeeper PBX provides connections for a microphone, headphones, mixer, sound card, and telephone handset. The stereo output jack on the back of the unit provides your voice on one channel and only the caller's voice on the other channel. The balanced XLR output jack contains only the caller's voice. The Handset and Broadcast buttons select between talking on the handset, or sending and receiving through the audio connections.

Send 1	Balanced Female XLR
