June Product Showcase

Why Aquilon RS4 for live events?

We know the unit is a 4K/8K multi-screen presentation system.

Check out a few of our favorite features for what you do every day!

➤ **Dante audio feature allows for easy de / re-embed of up to 8 channels of audio per input and output. No need for audio splitters ahead of your video processor like most other products.**

➤ **Most powerful processor on the planet with up to 24 inputs, and 20 outputs, all 4K 60Hz HDR**
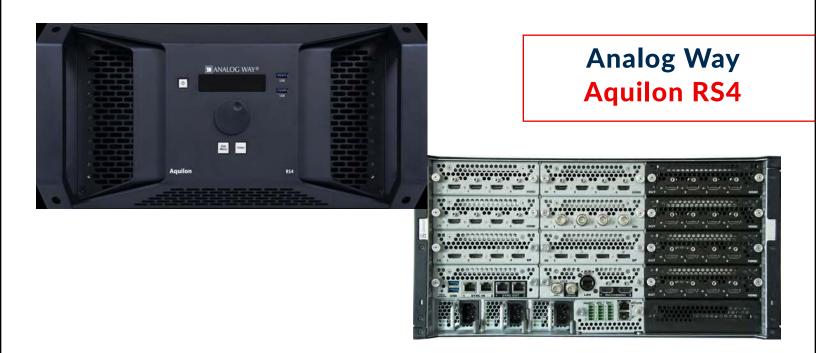

➤ **Up, down, and cross conversion of leading HDR and SDR signal types to optimize the image quality on individual displays**

➤ **1 Frame of latency when properly configured for near real time processing of live events**

➤ **User friendly Web RCS GUI control allows for up to 5 operators per processor for easy labor division on large shows**

➤ **Dual monitoring outputs with up to 64 windows per output for ultimate flexibility in preview capabilities**

➤ **Redundant power supply standard for rock solid reliability**
