

# Roland V-160HD

## Streaming Video Switcher

PRODUCT  
OF THE MONTH

- ✓ 16 inputs with frame rate converter - (8) 3G-SDI and (8) HDMI (four with scalers)
- ✓ 7 video outputs - (3) 3G-SDI, (3) HDMI, and USB-C streaming webcam (UVC)
- ✓ On board monitor to view Multi-view, Inputs, Still bank, or Program video
- ✓ 40-channel Digital Audio mixer from embedded audio, XLR/TRS combo jack w/ selectable Phantom power, and RCA Line
- ✓ Tally breakout included plus Roland Smart Tally to iOS/Android

This Roland V-160HD is everything you need to manage a hybrid event room. Up to 16 mixed video inputs can be composited in the eight-layer video effects engine on Program, with an AUX bus and Multiviewer also available for up to 7 outputs. USB-C Streaming webcam output is included for use without any additional devices or drivers, using standard UVC video drivers for up to 1080p streaming.

An impressive 40 channels of audio can be handled by the built-in auto mixing to bring together analog sources as well as the embedded audio. In addition to the standard GPIO Tally breakout for studio cameras, Roland Smart Tally allows any iOS or Android device to act as tally for other stations such as graphics or playback.
