OF THE MONTH**

# Panasonic PT-RQ25KU

20,000 Lumen 3-Chip DLP Laser Projector

- ✓ 20,000 lumens / 21,000 lumens (center)
- ✓ 4K (3840 x 2400) Resolution
- ✓ 25,000:1 Contrast Ratio
- ✓ Compact Form-Factor: The PT-RQ25K Series is 40 % smaller and 35% lighter than the PT-RQ22K
- ✓ Cage is included in the rental

## Compact Form-Factor

The PT-RQ25K is 40% smaller and 35% lighter than the previous generation of the trusted 20K Panasonic 3-DLP projectors and the PT-RZ21K/RQ22K. In fact, this size is much closer to the PT-DZ10KU that gave us just 10,000 lumens a few years ago. That size and weight advantage provides a wide impact on case size, shipping cost, and how this powerhouse can be used. New features for the platform include the Smart Projector Control smartphone app with NFC function, Remote Preview Lite, and as with ALL Rentex Panasonic 3-DLP projectors, the Geometry Manager Pro license is included.

## Engaging Visual Experience

Quad Pixel Drive creates smooth 4K images with vivid 3-Chip DLP color and high brightness. A new Dynamic Contrast setting delivers higher white brightness and deep blacks during high-contrast scenes. Gradation Smoother reduces color-banding while improved point-based black-level adjustment supports edge-blending over curved screens with pixel-level precision.

## Reliable and Maintenance-free

A hermetically sealed optical block is cooled by a high-efficiency liquid-cooling system enabling maintenance-free projection for 20,000 hours. Multi-Laser Drive Engine prevents brightness loss in the event of diode failure, while Backup Input switches to a backup signal if the primary signal is interrupted for peace of mind.
