Absen PL2.5 Pro 2.5mm Indoor LED Tile

Equipped with Brompton Tessera processing, the PL2.5 Pro support the latest HDR10 standard & 16bit grayscale, delivering a higher dynamic range with pure whites, deeper blacks and a wider color gamut.

PL2.5 Pro's brightness can reach up to 1500nit after calibration, able to maintain excellent display performance in brighter environments.

Supports 3840hz refresh rate, promising outstanding on-camera visual effects.

Curve-ready auto-lock system with magnetic automatic connection for fast and easy installation with safety. And the Auto-Eject system enables fast, easy and convenient disconnection of panels.

The Absen PL2.5 Pro brings another LED option to the Rentex inventory and joins the ROE Black Pearl 2 and Theatrixx Nomad 2.6. The PL2.5 Pro offers superior contrast and high precision alignment. UltraBlack Technology - Small-sized non-reflective LEDs, combined with matte and super black mask, the PL2.5 Pro has a superior contrast. Integrated auto-lock and auto-eject systems allow super-fast and easy installations at the push of a button, including convex and concave curves built-in.
